Indoor Air Quality (IAQ) today is a serious issue. Many countries have instituted IAQ standards and have come up with strategies that address emissions and IAQ control. These countries have focused not just on residential areas but have addressed commercial offices/complexes, auditoriums and even air conditioned buses/trains. Today, there are no IAQ standards in India and research on IAQ and health is rather "thin".

In this Seminar, there were presentations on:

Indoor Air Quality – International Perspectives and Partnership Approach

IAQ & Health and

IAQ in Building Codes.

These presentations were followed by a Panel that would speak the regulatory aspects; current research; emissions from paints and seals and IAQ control.
Indoor Air Quality
Addressing the Issue through Partnership between
Government, Business and Communities
A Seminar conducted in Partnership between EMC LLP's Ekonnct and
Rachana Sansad's Institute of Environmental Architecture

Tuesday, February 28, 2012
03:00 pm to 6:00 pm

Venue: Noshir Talathi Auditorium, Rachana Sansad
278 Shankar Ghanekar Marg, Prabhadevi, Mumbai 400025
Tel: 022 24301024; Ext. 601

About this Seminar:
IAQ today is a serious issue. Many countries have instituted IAQ standards and have come up with strategies that address Indoor emissions and control. These countries have focused not just on residential areas but have addressed commercial offices/complexes, auditoriums and even air conditioned buses/trains. Today, there are no IAQ standards in India and research on IAQ and health is rather “thin”.

Idea is to get Research/Academia; Builders/Architects; Entertainment Plaza Operators, Air Cleaning and Air Quality Monitoring companies; Paint and Seal manufacturers, Medical fraternity; Media, Policy/Planners and Regulators to come together and work towards lobbying IAQ standards and related strategies for India.

About Environmental Management Centre LLP:
Environmental Management Centre LLP (EMC LLP) was established in 1996. EMC LLP’s consulting services are essentially strategic, knowledge driven and supported through research and training. In all the consulting assignments, EMC LLP’s expertise lies in harmonizing economic, environmental and social considerations (often called triple bottom line) in the business logic, development plans and policy frameworks.

Over the past 15 years, EMC LLP has conceived, developed and executed a number of national, regional and international assignments that have set several “firsts”. Many of these assignments have stimulated action leading to policy reforms, sustainable investments and led to long term capacity building.

Visit www.emcentre.com to know more about EMC LLP.

About Ekonnct:
EMC LLP recognizes importance of building capacity and careers of students and professionals in the field of environmental management. Towards this end, EMC LLP has made conscious efforts by establishing a networking platform called Ekonnct. EMC LLP distinguishes itself from the commercial consulting world through practicing Ekonnct initiatives.

Ekonnct is fully supported by EMC LLP. Visit www.ekonnct.net for more details on each of the above initiatives. Event on "Indoor Air Quality" is the third Seminar of Ekonnct Series.
